Experience

Intelligent Revenue LLP

Dec 2023 – Aug 2025

Fullstack Software Engineer

- Developed a web scraping bot in **Python** using **Selenium** and **requests** library that fully automated a manual data collection workflow. Used **mypy** and **pytest** for code quality and unit testing
- Defined ELT logic and generated excel reports from the extracted data using **Pandas**
- Created **EC2** instances to run scraping workloads and host a SonarQube server
- Created **RDS** and **AppRunner** services in AWS using **CloudFormation** which ensured high availability and elasticity of API and Database resources
- Created functions, views in **PostgreSQL** database to execute CRUD operations
- Created a webhook API using **FastAPI** and **SQS** that handles interactions between internal resources and third party services
- Created and maintained Lambda functions in AWS using **SAM Framework** which streamlined development and testing procedures
- Enforced user and network level restrictions in AWS using **IAM** and **VPC**
- Implemented user authentication and RBAC authorization using **Auth0**
- Created templates for **BitBucket** pipeline that automated CI/CD workload

Digital Avenues Infotech Pvt. Ltd.

Oct 2022 – Dec 2023

Software Engineer

- Developed a web scraping bot in **Python** using **Scrapy**, **Selenium** and **BeautifulSoup** library to collect data from various websites regularly
- Defined ETL logic over the extracted data using **Pandas**
- Created functions, tables, views in **PostgreSQL** database to execute CRUD operations
- Created stored procedures and table functions in **BigQuery** to execute data warehousing tasks
- Created **Compute Engine**, **App Engine** and **Cloud Function** resources to execute scraping and ETL tasks
- Developed functionality to interact with **Google Cloud Natural Language API** to accomplish sentiment analysis and translation tasks
- Developed prototype sentiment analysis model using **Keras**

Software Trainee

Jul 2022 – Sep 2022

- Received training to develop fullstack application using **PostgreSQL**, **ExpressJS**, **AngularJS**, **NodeJS**

Projects

- **Credit Risk Analysis Platform** | Source Code
- **Financial Sentiment Analysis Model** | Source Code

Education

Chandigarh University

Master in Computer Applications

2025 – Present

CGPA: 8.9 / 10 (Upto 2nd Semester)

Ramakrishna Mission Residential College

B.Sc (Hons.) in Mathematics (Minor: Computer Science, Statistics)

2019 – 2022

CGPA: 7.28 / 10

Skills

Programming: Python (3+ yrs), SQL (3+ yrs), JavaScript (2+ yrs), Dart (1 yr), C/C++ (2+ yrs)

Technology/Tools: AWS, GCP, Git, BitBucket, PostgreSQL, Selenium, Pandas, scikit-learn, PyTorch, FastAPI, ReactJS, NodeJS, NestJS, Excel, Jira

Certifications & Workshops

- **Quantum Computing and Quantum Machine Learning Workshop** – University of Arkansas at Little Rock (June 2026)
- **Generative AI Foundations** – upGrad × Microsoft

Languages

Languages: English (Professional), Bengali (Native), Hindi (Basic)
